

The background of the slide features a large, faint watermark of the University of Oxford seal. The seal is circular, with the words "UNIVERSITY OF OXFORD" around the perimeter. In the center is a shield with a crown on top, and the Latin motto "DOMINUS MINA" is visible within the shield.

Apple Device Administrator's Meeting

IT Services, University of Oxford
Hilary Term, 2018

Agenda

12:30 - Introduction

12:35 - Ben Goodstein: macOS 10.13 and the iMac Pro for Administrators

12:50 - Q&A

12:55 - Chris Beard: Meltdown and Spectre: Staying Safe

13:10 - Q&A/Discussion

macOS 10.13

and the iMac Pro

**Ben Goodstein, Technical Leader (Apple)
IT Services, University of Oxford
@fuzzylogiq - Twitter, Github & Macadmins Slack**

macOS 10.13 & iMac Pro Admin Changes

- Imaging (mostly) dead
- APFS - APple File System
- Secure Token - For Encryption
- UAKEL - User Approved Kernel Extension Loading
- UAMDM - User Approved MDM
- Secure Boot

Imaging (Mostly) Dead

The background of the slide features a grayscale image of a microscope positioned over a hard drive, which is resting on a stack of papers. The microscope's lens is focused on the hard drive, creating a sense of precision and technical analysis.

- ☞ Installation recommended
- ☞ Firmware updates
- ☞ iMac Pro cannot boot from network
- ☞ DEP/bootstrapp

APFS - New File System

- ☞ Not readable by 10.12
- ☞ Cannot go back to 10.12 without reformatting as HFS+
- ☞ Unknown side-effects of downgrading
- ☞ Everything converted except Fusion & HDD

Secure Token for Encryption

- Allows use to add/remove users from FileVault
- First user created with Setup Assistant to log in
 - or first mobile account (if created by macOS)
- Won't work if created with scripts
- Use `sysadminctl` to check and grant/revoke other accounts

User Approved Kernel Extension Loading (UAKEL)

- ☞ Users must accept kernel extensions in Sys Prefs
- ☞ If they don't they won't run (unless installed before upgrade)
- ☞ AntiVirus, Tablet Drivers etc.
- ☞ Only way to avoid is to enrol in MDM
- ☞ But...

User Accepted Mobile Device Management (UAMDM)

- Introduced in 10.13.2
- Users must accept enrolment into MDM
- Cannot be done remotely
- Only way to avoid is to use DEP
- Will allow you to whitelist kexts

CONFIG

Secure Boot

- Introduced with the iMac Pro/T2
- Boot only trusted/signed macOS/BootCamp
- Can be managed with Startup Security Utility in Recovery
- Also control whether iMac Pro can boot external
- `systemsetup` can no longer boot to another partition
